

How do I use the Quick Search?

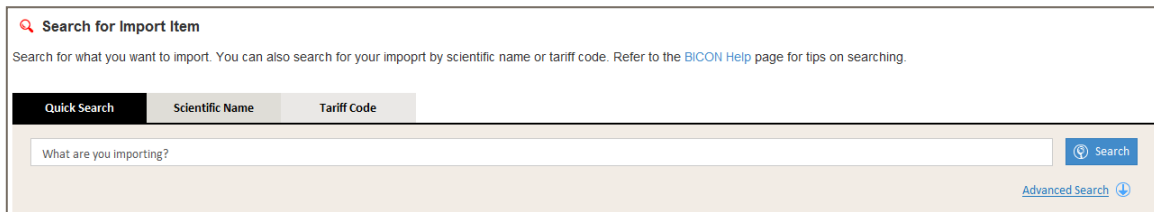

This task card demonstrates how to perform a Quick Search within the BICON web.

1. Search for Commodity

From the BICON web homepage, select the **Quick Search** tab and enter the common name for the commodity that you wish to import in the **What are you importing?** text box. Select .

Examples: shells, bag, veterinary therapeutic, cat, pet food.

*Select **Advanced Search** to refine additional fields.*

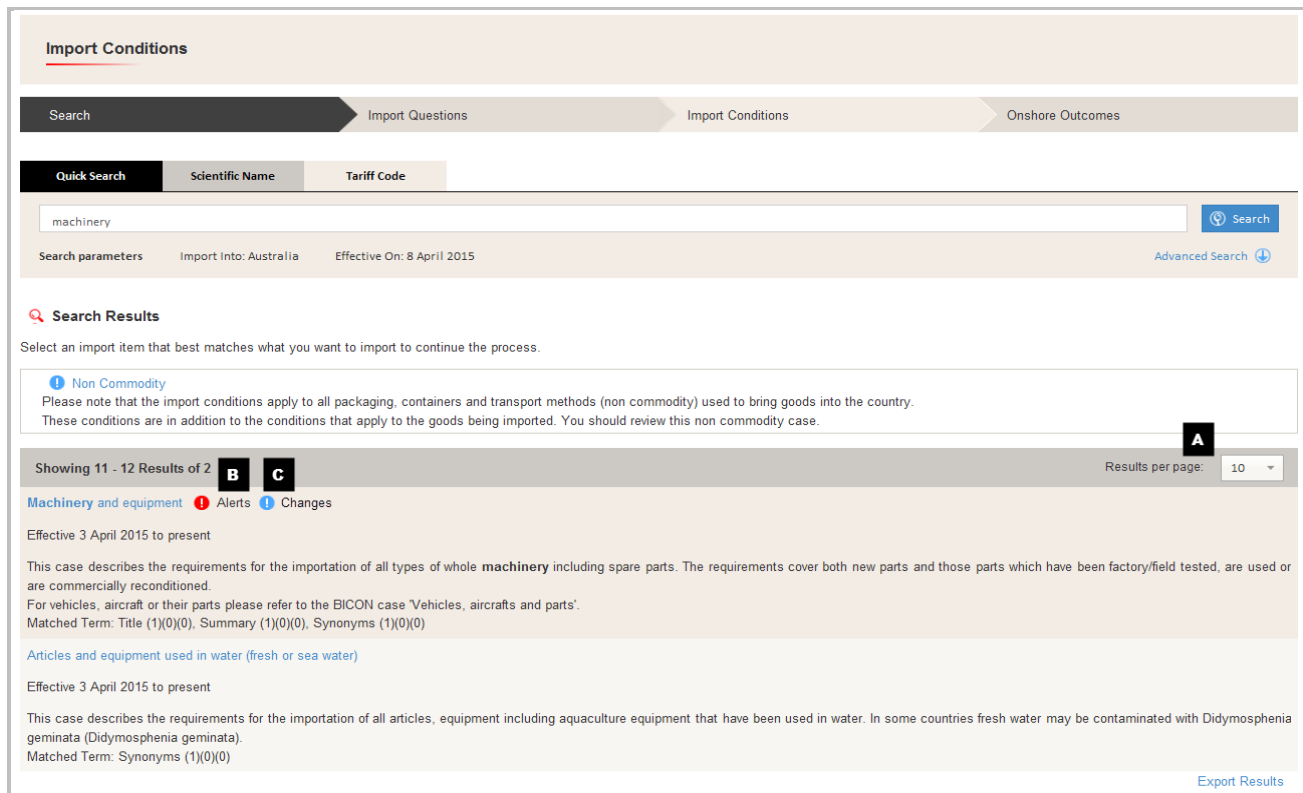

2. View Results

BICON will present a list of cases that match your search terms. Review the case names and description to determine the most appropriate case.

BICON does not recognise specific names such as: product names, animal breeds, or trademarked names.

If your search returns **No Results Found**, make your search terms more general.

- A. Change the **Results per page** dropdown to view more/less results per page
- B. The  icon identifies a biosecurity alert is current for this case. Select  to view the alert.
- C. The  icon identifies that this case was subject to recent changes. Select the  icon to view a summary of the changes.

3. Select Case

Once you have determined the most appropriate case select the [Case Name](#) to proceed in determining your import scenario and viewing the import conditions.
