

How do I view the most current version of a Permit?

This task card demonstrates how to view the most current version of a Permit. It will show the entire history of the Permit, including whether the Permit has been revoked, suspended, has expired, or has been created as the result of a Permit variation request.

1. Search for a Permit

Login to BICON and select Permits from the main menu.

Select **Permit** from the question drop down menu, then select Search

BICON will display all Permits associated with your account.

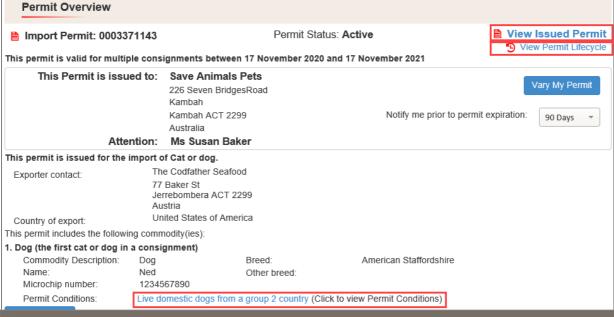

Under the Permit ID column, select the hyperlink in blue, of the permit you wish to view.

2. Permit Overview

BICON will present the **Permit Overview**. To see the Permit, select **View Issued Permit**. It will open in a PDF document. To see the Permit Lifecycle, select **View Permit Lifecycle**.

Select the Permit Conditions link to view Permit Conditions for the commodity(ies).

How do I view the most current version of a Permit?

3. View Permit Lifecycle

From the **Permit Overview** screen, you can select View Permit Lifecycle, to view the process from Application, through to Import Permit, including any Variation Requests or further processes. If you hover over each process, you will be able to view more details. To return to the **Permit Overview** page, select Go to Permit.

If the permit you are viewing is **Varied**, select Permit (Active) to see the **Active Permit Overview**.

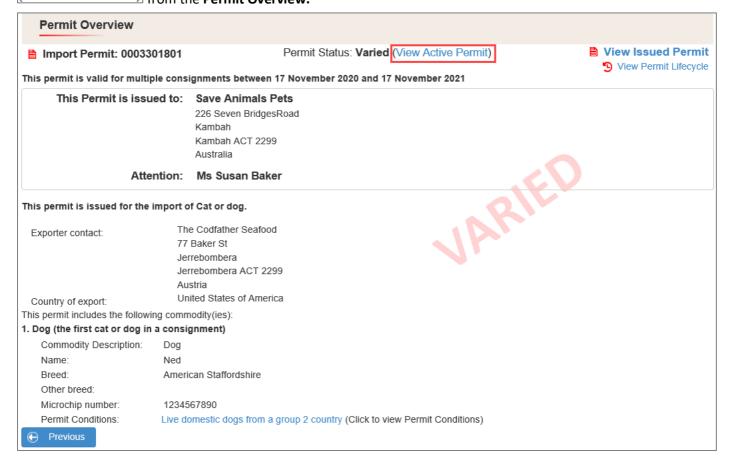

NOTE: Hover over the other links to show work item IDs and status.

4. View Active or Latest Permit from a Varied Permit

4.1 View Active Permit

If you are viewing a **Varied** permit with current validity dates, you can view the new, **Active** Permit by selecting (View Active Permit) from the **Permit Overview**.

4.2 View Latest Permit

If you are viewing a **Varied** permit which has since **Expired**, you can view the latest Permit by selecting (View Latest Permit), from the **Permit Overview**.
